## Key Features

### Price Intelligence

Monitor competitors' responses to your price changes, get daily updates on global prices and more via our easy-to-use web portal and mobile app

### Tender Data

Improve strategic decision-making process with global analytics and insights to local dynamics in real time

### Cost of Treatment Data

Compare costs across therapies and indications using our cost-of-treatment calculator

### Reimbursement Data

Track reimbursement data by indication for key global markets

### News and Country Reports

Get daily policy and reimbursement updates for products around the globe

### HTA Data

Easily compare decisions across products and their comparators at the indication level with the most comprehensive HTA coverage

### Analogue ID

New ways to search for analogues in early-stage and launch price evaluation with endpoints

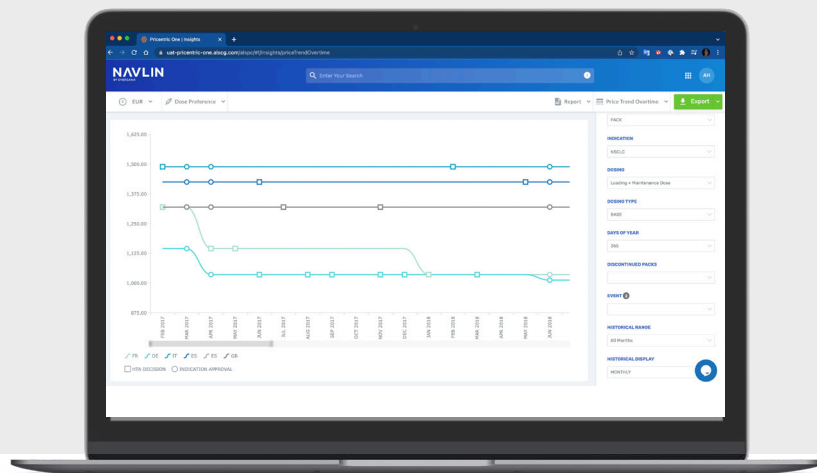

### Country Guides

All-new country guides that better support decisions and are more AI-search compatible

### Innovative Agreement Support with Endpoints & More

Local tracking of analogue and competitor agreements

# The NAVLIN Difference

## Accurate

NAVLIN Price & Access Data is updated in real time, providing users with the industry's most accurate pricing and market access data. Our database manages every product in more than 100 countries and provinces, including complete historical coverage in most countries.

## Easy To Use

The combination of comprehensive pricing and market access data, one-click insights and expert support enables teams to focus on strategy and improved decision-making.

## Expert Support

A new generative AI assistant featuring natural language processing for intuitive queries across the price and access database, news, country guides, and HTA documents. Our team of analysts offers 24x7 support and assists in the development of custom reports to meet your most pressing needs.

## Comprehensive

NAVLIN Price & Access Data provides global pricing, analytics, HTA, regulatory, clinical, and economic data along with news and insights in a single platform.
